# CHAPTER 1

---

## Quickstart

---

TravisCI Continuous Integration / Continuous Deployment test project. Flask application with automated code metrics, tests and Heroku deployment (app temporarily accessible [here](#))

### # Quickstart

To deploy app follow these steps:

1. Create heroku app (web interface or HerokuCLI):

```
$ heroku create --region eu --buildpack heroku/python flask-travis-ci
```

2. Clone this repository:

```
$ git clone https://github.com/mdyzma/travis_python_test``
```

3. Change Heroku API token and webapp name for your data
4. Activate repository in TravisCI

## CHAPTER 2

---

### Indices and tables

---

- `genindex`
- `modindex`
- `search`
